

Dr. Kelley:

Thank you for fixing my knee twice – without your treatment I wouldn't have been able to play these last 4 years of football at Bowdoin. When I first tore my ACL in high school, I had the feeling that my career was over, especially on senior day against East Haven when I dressed to play but you wouldn't let me on the field (thank you for that). This past season I was captain at Bowdoin and even a few awards at the banquet, none of which would've been remotely possible if not for you and the surgery. As I hopefully make it to med school one day to be a doctor, I'll always keep in mind how you changed my life so I remember the impact medicine can have on people's lives. Thank you for everything.

-Tyler
